

ARGIE MARIANO

Nueva Ecija, Philippines | 0991-387-9431 | argiemariano022@gmail.com | <https://argie002.github.io/portfolio/>

SUMMARY

IT professional with over 2 years of experience managing high-volume healthcare data while ensuring accuracy and quality. Skilled in JavaScript, Node.js, NestJS, Java, MySQL, and MongoDB, with hands-on experience building web applications and REST APIs through personal projects. Passionate about software development, problem-solving, and continuously learning new technologies.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Java
- **Backend Development:** Node.js, NestJS
- **Databases:** MySQL, MongoDB
- **Web Technologies:** HTML5, CSS3, Bootstrap
- **Tools:** Git, GitHub, VS Code, Postman

PERSONAL PROJECTS

Foreign Exchange Checker App - HTML • CSS • JavaScript

GitHub: <https://github.com/argie002/foreign-exchange-checker-app>

Live Demo: <https://foreign-exchange-checker-app.onrender.com/>

- Developed a responsive Vanilla JavaScript foreign exchange application with live API integration, enabling users to perform accurate real-time currency conversions and side-by-side comparisons.
- Engineered interactive historical exchange rate charts using modular ES6 architecture, providing intuitive visual data trends to help users track rate fluctuations over time.
- Implemented Local Storage persistence alongside DOM updates, allowing smooth tracking of favorites and conversion history while maintaining optimal UI performance.

Weather App - Node.js • Express • JavaScript

GitHub: <https://github.com/argie002/weather-app>

Live Demo: <https://weather-app-odi7.onrender.com/>

- Developed a full-stack weather dashboard using Node.js, Express, and Vanilla JavaScript, delivering a fast, responsive user interface for location-based weather searches.
- Integrated geocoding and external weather APIs into the server backend, allowing users to retrieve accurate forecast data for any geographic location globally.
- Implemented server-side caching mechanisms to store frequent queries, significantly reducing external API consumption and improving application load times.

WORK EXPERIENCE

Accenture | Manila, Philippines

Data Analyst

May 2022 – Jan 2025 (2 years, 7 Months)

Health Operations New Associate

- Processed high volumes of healthcare claims and patient records while maintaining accuracy and meeting service-level targets.
- Reviewed complex provider appeals and clinical documentation in compliance with healthcare regulations and data privacy standards.
- Analyzed data to identify trends and support process improvements, contributing to operational efficiency.
- Maintained accurate patient and partner information across multiple internal systems, ensuring data integrity.
- Consistently exceeded productivity and quality targets while collaborating with team members to resolve operational issues.

EDUCATION

Nueva Ecija University of Science and Technology

Bachelor of Science in Information Technology

Major in Database Applications Programming

Capstone Project | Talavera Central School Integrated PDS Information System

- Developed an integrated Personnel Data Sheet (PDS) Information System for Talavera Central School using Java and MySQL.
- Integrated the system with a Student Information System and QR Code-based Attendance Monitoring System.
- Generated reports using JasperReports and utilized XAMPP and NetBeans IDE for development and testing.

SOFT SKILLS

- Problem Solving, Analytical Thinking, Attention to Detail, Communication, Team Collaboration, Time Management, Adaptability, Continuous Learning, Critical Thinking, Process Improvement.
